

Don't drop your deuce.

Poop Smart to preserve fishing and hiking opportunities in Clark County.

We get it. Most rural recreation areas don't have bathrooms. But there's a right way and a wrong way to poop in the woods... or near the river.

How much difference can one person make? In 24 hours, one person can contaminate 4.75 million cups of water. But, when you do the right thing, you can help keep the woods clean and fishing areas open.

Check out gear options and learn how to poop in the woods. Share that you **#PoopSmartClark**.
